CPCI Launches New Learn on Demand Prefab Precast Concrete Educational Video Platform

March 11, 2020 –Ottawa, Ontario – The Canadian Precast/Prestressed Concrete Institute (CPCI) is thrilled to announce *Learn on Demand Prefab Precast Concrete*, a new and free platform for educational videos.

Learn on Demand Prefab Precast Concrete is a continuing series of interactive educational videos geared towards architects, engineers, real estate developers, academics, students, government officials and construction professionals who want to learn more about precast concrete products and services. Participants must answer questions relating to the video content to advance the video and verify participation. Upon completion the viewer will be sent a certificate of participation to qualify for Continuing Education Units (CEUs) and/or Continuing Education Credits (CECs).

***Learn on Demand* and CPCI Continuing Education Program**

CPCI's Continuing Education Program emphasizes the education of architects, engineers and other AEC professionals. It helps those in the construction industry to stay up-to-date, master new knowledge and skills, plan for the future, and responsibly meet the role society entrusts to a professional.

“CPCI is proud to offer our first interactive educational video system dedicated to the AEC and construction industries. All courses offered through this system satisfy the continuing education requirements of architects, engineers and AEC professionals in all provinces,” says Brian Hall, CPCI Managing Director.

Two educational videos are currently available on the *Learn on Demand Prefab Precast Concrete* website: *ABC Accelerated Building Construction* and *The Design of Precast Concrete Hollowcore Diaphragms*. More educational videos will be posted over the coming weeks.

Visit *CPCI Learn on Demand Prefab Precast Concrete* today to learn more about precast concrete and to earn Continuing Education Credits: <https://cpci-learnondemand.com>.

About Canadian Precast/Prestressed Concrete Institute (CPCI)

CPCI is the prime source of technical information about precast and prestressed concrete in Canada, whose mission is to be the body of knowledge for precast and prestressed concrete in Canada and to educate, advocate and raise awareness with key decision makers on the outstanding attributes of precast concrete products and systems. The Institute is the publisher of the CPCI Design Manual 5th Edition, the Architectural Precast Concrete Walls: Best Practice Guide, and over 100 other publications.
